

Active Directory Protection Matters

Active Directory Mismanagement Exposes 90% of Businesses to Breaches

Complex policies for access management create opportunities for exploitation

The focus of every attacker and red team for moving laterally in an enterprise

Penetration Testers Breach Active Directory Nearly 100% of the Time Indicating That Attackers Can Do the Same

74%

Almost always easily obtained admin credentials

Reliably preventing an attacker's access to Active Directory is critical

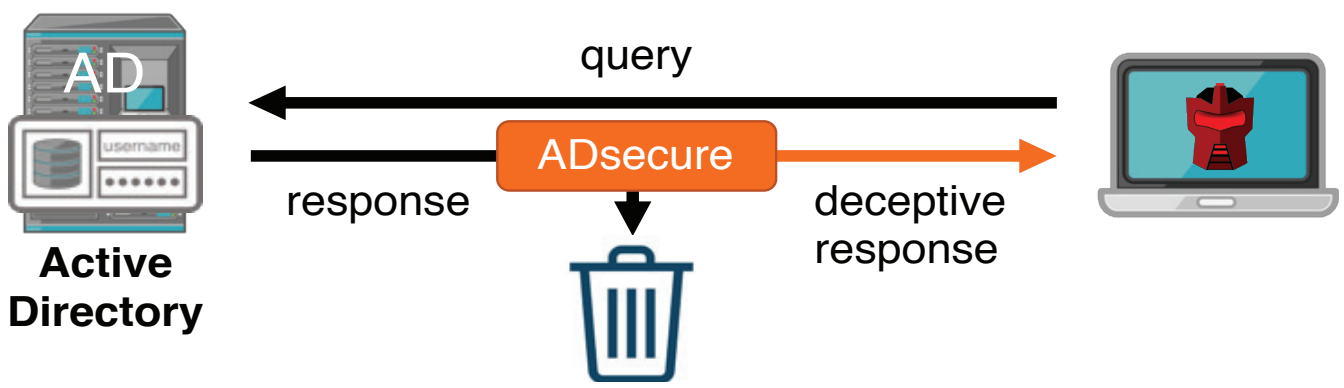

Many open source tools automate techniques that simplify AD exploitation

The Attivo Networks ADSecure Solution Shifts Power to the Defender

Disrupt the Active Directory Attack Cycle

With ADSecure, the attacker requests production AD objects and receives deception.

Record TTPs

Hunt Threats

Improve Defenses

Attivo Networks ADSecure

Detect and Protect

Capture Attack Telemetry for Adversary Intelligence

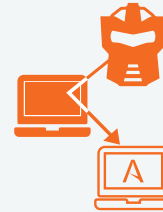

Active Directory Security Benefits

Detect Malicious AD Queries

Hide Credentials and System Data

Alter Responses and Derail Attacks

Provide Detailed Telemetry (TTP's)

With the ADSecure solution organizations improve Active Directory security without touching the production AD environment

"ADSecure finally gives me an advantage over the attacker."

- Scott, VP Security
