Print out this cybersecurity-focused, family friendly word-search and race to see who can complete it first, you or your kids? At the end, we have included some useful tips to share with your young ones about how to stay safe online during this time. Have fun!

Take a photo of your completed word searches and share it with us on Twitter or LinkedIn @AttivoNetworks
Find and circle the words hidden below. Make sure to look in all different directions for these cyber-words. Have fun and stay safe online.

**TIPS TO KIDS FOR STAYING SAFE ONLINE**

1. Remember to not post your private information online such as your phone number or home address.
2. Make sure to tell your parents who you are talking to online and avoid communicating with people you don’t know.
3. To prevent a stranger from stealing your password, create a strong password that someone could not easily guess and use different passwords for different accounts.
4. Avoid clicking on all links you receive and be careful of who is sending you the email.
5. The internet does not have a delete key. Try to avoid saying things online that you think will be a mistake in the future.
6. Watch out for strangers with fake profiles. Check the person’s profile for mutual friends and if their profile picture looks fake.
7. Make sure to communicate with your parents on what’s going on in real life, online, and how to stand up to cyber bullies.
